Contact Officer Sarah Witham

As a citizen of the Northern Territory since 1962, married , raised four Territorians and now retired to Darwin ,I have spent considerable time on studying the discussion paper.

All I want to now say is .. please let common sense prevail,

The majority of citizens of the NT are born normal men and women who do not object to being called men or women . male or female.You can not change this reality.

The minority of humans who are sadly born disabled with mixed hormones is a very small minority. No one wants to vilify them but you can not create a third sex.These people need to identify as male or female .

Please do not change our society for the minority, most people want their lives to continue peacefully and in the "age old "normal way.

please remember the rights of of every child to have a Mother and a Father'

To produced happy normal citizens children need to be loved by a female Mother and a male Father.

Our right to uphold our freedom to worship as our consciences tell us must not be taken away.

Our society will only suffer if these rights are changed .

Most citizens are trusting our elected members to act in a sensible way .thanking them.

Yours faithfully,
